Les Nuits Blanches de La Tuilière

« A white wine with character :
Black grapes → White Wine »

Along the Gironde estuary and opposite Margaux, Château La Tuilière dominates its vineyard on two opposite slopes of the same hillside on the Right Bank of Bordeaux.

14 hectares of vines facing south, southwest, benefiting from the mild estuary, produce red, crémant and rosé wines.

The three grape varieties, Merlot, Cabernet Sauvignon and Malbec, cultivated on clay-limestone plots allow blends that mark the property's cuvées and their typicality.

COMPOSITION

Soil type : Clay, clay-limestone

Harvesting : Mechanical

Technical features:

Plot selection, sorting of the harvest, direct low pressure pressing, alcoholic fermentation at low temperature.

Bottling :

- Early bottling
- Sterilisation using hot water to avoid any chemical inputs.

CONSUMPTION

12°C/14°C

9°C/10°C

TASTING NOTES

The color is very pale with silvery and pearly reflections.

The nose is rich, offering a wide aromatic palette, ranging from white fruits to notes of ... English candy ! The palate is lively and fresh.

A white wine from black grapes from the Bordeaux terroir : outstanding !

Food and Wine Pairing : This wine will beautifully go together with grilled fish, shellfish and seafood. Oysters a plus.

Let's think out-of-the-box : smoked salmon, sweetbreads, asparagus, very dry goat cheeses... and many more

OUR CREDO

- Offer quality products, free of all elements harmful to human health
- Adopt cultural practices that preserve the environment
- Respect and protect our employees

These principles lead us to go beyond the obligations of our labels.

We keep 20% of our land unplanted, in biodiversity, to promote the habitat of species and the renewal of wild flora.

We do not use any herbicides and the majority of our treatments and all our fertilizers are made with biocontrol products.

We have reduced sulphites below our label standards.

No chemical input is used during bottling.

Forklifts are electrically powered. Our cartons and wood packagings come from sustainably managed forests.

Even the electricity we consume is green.
